

Student Internship Opportunities—Apply Today!

In an effort to more effectively promote internships offered to AMSA student members, the [AMSA Student Membership Board of Directors](#) offered an opportunity to companies to list their internships on the [AMSA Meat Science Career Center](#) and have them featured in this special newsletter sent out to all student members.

The [AMSA Student Membership Board of Directors](#) is excited to announce the following internships with the following organizations. Please visit the [AMSA Meat Science Career Center](#) for additional information and take advantage of these outstanding internship opportunities!

Quality Assurance Intern ~ AB Washington Beef LLC

We are currently soliciting participation in a Quality Assurance internship at AB Foods, LLC, Washington Beef plant, located in Toppenish, Washington. We are seeking to fill one position for the summer of 2016.

Preference will be given to a student who is working towards an under-graduate or graduate degree in Meat Science, Food Science, or other ag related field. Qualified applicant must have basic computer skills, good communication skills, basic meat science knowledge and the desire to gain work experience in a progressive meat production facility.

The program scope consists of working with food safety, quality assurance, and regulatory programs in the Processing (Slaughter), Fabrication, and Value-Added Products production divisions. Major components include:

- Conduct quality assurance and food safety audits in the production process
- Conduct validation studies at various points in the production process
- Other special projects as assigned

Please submit application to AB Foods, LLC, via www.agribeeef.com, under the "Employment" tab.

Cargill Internships

products and services. With innovation, creativity and teamwork, we're transforming entire markets – and peoples' lives. We can have the same incredible impact on your career. Working at Cargill is an opportunity to thrive – a place to develop your career to the fullest while engaging in meaningful work that makes a positive impact around the globe. You will be proud to work for a company with a strong history of ethics and a purpose of nourishing people. We offer a diverse, supportive environment where you will grow personally and professionally as you learn from some of the most talented people in your field.

An internship at Cargill provides valuable, hands-on, real-world experience – to put all those long nights of studying to good use. You will learn about Cargill and the career opportunities available in your career area and further develop your talents. Our internships are typically 12 weeks in duration during the summer and will offer you challenging projects with the chance to interact with a variety of Cargill employees and business partners. You will learn from industry professionals, gain valuable experience and contribute fresh ideas to your team. Show us you have Cargill potential and we'll line you up for full-time employment after graduation.

Cargill's animal protein businesses provide wholesome, high quality, nutritious and flavorful products to customers ranging from foodservice operators and grocery stores, to food manufacturers and export markets. To support our focus on product innovation and quality, food safety, animal wellbeing, improved sustainability and community engagement, we are recruiting interns in career areas such as:

- Animal Agriculture
- Food Safety, Quality and Regulatory
- Operations
- Procurement

Summer Internship Program ~ JBS and Pilgrim's

At JBS, the world's largest protein company, we strive to be the best at what we do. Our challenge is to feed the world, and you can help us accomplish this mission. JBS is a global company founded from humble beginnings. Though we have grown, we still operate under the same values and goals our founder, Jose Batista Sobrinho, began with.

What a JBS Internship Looks Like: This is a 10-week program from June until August providing interns challenging, hands-on work experience in either a production or corporate business environment. JBS Interns work on meaningful projects and have the opportunity to present their work to company leaders. JBS has designed a world-class internship which includes:

- A built-in mentoring program
- Rotational peer shadowing
- Networking opportunities with senior management

JBS offers lasting education, experience, class credit and a journey inside the world's largest animal protein company.

Working with JBS is much more than an internship. It's an opportunity to learn how we feed the world, work alongside the people who make this happen, while being immersed in the guiding values of this multi-billion dollar global food company. Visit www.jbssa.com/careers to apply today!

There are currently 140 openings.

Research and Development Intern ~ Tyson Foods Inc.

An R&D intern will gain experience in product development by assisting technologists in the development of new products and processes for beef, pork or chicken, revising current products in order to improve product quality, profitability and/or competitiveness. A specific project will also be assigned to the intern at the beginning of the summer and conclude with a brief report and presentation on the results of their project at the end of their internship. The length of the internship will range from 9 -14 weeks.

Education: Junior, senior or graduate level status preferred. Poultry Science, Animal Science, and Food Science majors preferred.

Computer Skills: Strong computer skills and the ability to multi-task. Working knowledge of Excel, Word, Access and PowerPoint.

Communication Skills: Strong verbal and written skills.

There are currently 5 openings and the employer will assist with relocation costs.
