

HOW TO: Networking using the Attendee feature

Once you have downloaded the app, "Check-in" using the Attendees function. You will be prompted to create an account using your e-mail address or by using a social media account.

After checking in to the guide, enter any contact information you would like to make visible to your connections in the app. (This information will not be viewable to all attendees, only those you approve.) This profile can act as a digital business card while you are at RMC.

You can now make connections within the app by clicking on the + sign beside another attendees name. The other person will be given an opportunity to "accept" the connection. The + sign will turn into a ✓ after the connection is accepted. Now, both parties will be able to view the contact information provided by the other within the app.
